

I oppose HR4026 why would you take away the informative station on xm radio? NAB's petition 04-160 should not be pass, when paying for the services of xm radio we should be informed of traffic and weather report just like everyone else. They provide the nation truck driver with up to the minute reports about traffic and allows the truck drivers and some of the motor public to make decsion about travel route around road closures due to accidents. With xm radio some drivers have reduced the risk of accident from not having to find local station on AM and FM radio. Also, xm radio you can find a station before you begin your trip and not have to chang the station all day long , no matter where you are going.d
